

Top Ten Questions To Ask of Your Enterprise

1. What are your most vital and critical enterprise processes and supporting systems?
2. If those processes and systems were no longer available, how would you get yourself back into business?
3. How do you currently minimize the damage to your enterprise from disabled or compromised information systems?
4. What procedures do you initiate to recover systems and processes that have been disabled or destroyed?
5. How will your employees and contractors respond in an emergency situation, especially one that involves evacuating the premises?
6. If you were no longer able to access your office, for whatever reason, how would you restore business operations?
7. Facing a business interruption event, how would you notify employees, family members, local authorities, and clients?
8. What policies and procedures have you established to keep your enterprise in business following an interruption event?
9. How do you measure the effectiveness of these responses, recovery and restoration programs?
10. How often do you test/exercise your enterprise response and recovery programs and when was your last test/exercise?

Contingency Now can help ensure all the above questions are answered effectively.
